An always-on connection to your financials

Accounting CS offers a completely new way to work with us—24/7, in real time, from any high-speed Internet connection.

It's as easy as online banking or shopping, and it's completely secure.

You can:

- Record bank activity
- Exchange files with us
- Do day-to-day bookkeeping
- Collect all your tax data in one place, automatically
- Use a chart of accounts and reports that are customized to your business type

You can:

- Manage business activity and financial data for multiple business locations or work sites from one central location
- Run up-to-date reports at any time during the reporting period
- Reconcile online bank transactions automatically
- See adjustments and notes from us instantly

One database, one interface

Accounting CS uses a single-database structure that makes working online easier than ever before. This means:

- Data is always up to date
- Corrections and changes are available instantly
- No imports, exports, or syncing
- No software updates
- Real-time online collaboration makes getting help easy

Cloud-based convenience:

- **Anytime-Anywhere Access**—Access your information 24 hours a day, 7 days a week, from any Internet connection in the world
- **No Manual Updates**—Accounting CS is remotely hosted, so we handle software updates and other maintenance automatically
- **Reduced IT expenses**—Off-site hosting puts less demand on your in-house IT resources

State-of-the-art security

Working in the cloud offers a level of security far more advanced than site-based hosting, including:

- **Built in redundancy** including multiple data locations, Internet connections, and power sources keep Accounting CS up and running at all times
- **Secure password protection** provides you with worry-free access
- **256-bit encryption** protects your data as it travels between off-site data systems, our firm, and your computer
- **Customizable permissions** let you grant access to everyone you choose, and no one you don't
